Report No: 02-042  

21 December 2002  

Test Dates: 23 & 24 October, 1 & 2 November 2002  

SUMMARY OF TESTING: LOUVERED BAHAMA SHUTTERS  

Client:  
Atlantic Shutter Systems  
3239 HWY 301 NORTH  
LATTX, SC 29565  
Phone: 877-437-0608 Fax: 843-752-0111  

ATLANTIC SHUTTER SYSTEMS: LOUVERED BAHAMA SHUTTER  

WIND LOADS: Specimen A1 was wind loaded in accordance with ASTM E 330-97. Positive wind loading verified a Design Load of 60.0 PSF and was discontinued to preserve the specimen for negative wind loads. Negative wind loading verified a Design Load of -60.0 PSF, loading was continued until the specimen's anchorages failed (DL +/- 62.4 PSF, proven but not taken advantage of during the required cyclic wind load testing).  

IMPACTS: Specimen A2, B1, B2 & B3 were impacted in accordance with ASTM E 1886-97 per specification ASTM E 1996-02 at Missile Level D. None failed as a result of impacts.  

CYCLIC WIND LOADS: Specimen A2, B1, B2 & B3 were subjected to cyclic wind loads in accordance with ASTM E 1886-97 per specification ASTM E 1996-02, Table 1. All specimen successfully completed the cyclic wind loads to verified a Design Load of +/- 60 PSF.  

CONCLUSION: Following testing all specimen were disassembled. No failures were observed in the shutters, the fastenings or anchorages, except as noted in specimen deliberately tested to failure, descriptions of these follow the relevant data. The shutter product here in and in the accompanying drawings complies with Standard Specification for Performance of... Storm Shutters Impacted by Windborne Debris in Hurricanes for a Design Load of +/- 60 PSF at Missile Level D.  

Respectfully submitted,  
CONSTRUCTION TESTING CORPORATION  
(Miami-Dade Certification # 01-0212.01)  
(SBCCI Certification # TL-9741)
